

## LINEA BLISTER MB421

STE trends in blister thermoformer construction are:

- Continuous motion, Plane sealing
- Separate flexible machines (No Monobloc) to allow:
  - more layout flexibility, and more possibility to be adapted to the customer room
  - possibility to separate the machines in rooms with different classes
- Forming on the rear side, more compact machine.

The output of this kind of line is up to 200 Blister/minute.
